Education

Ahsanullah University of Science and Technology (AUST)

Bachelor of Science in Computer Software Engineering (CSE)

January 2021 – Present

CGPA: 3.75+ / 4.00

Experience

Geeky Solutions (Learnathon 3.0 Hackathon)

December 2024 – May 2025

- Competed in a 6-month industry-sponsored hackathon by Brain Station 23, collaborating in a team to design and ship a full-stack mobile product under real-world delivery constraints.
- Built core app features using **Flutter** and **Supabase**, applying **MVVM** architecture to deliver a scalable, maintainable mobile application from concept to production.

Skills

Languages: C/C++, Java, Python, PHP, Dart, C#

Frameworks / Tools: Flutter, ASP.NET Core MVC, JavaFX, Firebase, Supabase, GitHub Actions, SonarCloud

Other: HTML/CSS, OOP, MySQL, AI/ML, IoT, Blockchain

Projects

SOHOJOJI

[Demo](#) • [GitHub](#) | May 2025

- Built a one-stop service marketplace using **Flutter** and **Supabase** to connect users with skilled professionals for daily household tasks, reducing friction in booking and discovery.
- Implemented location-based service matching, a real-time booking system, push notifications, and a provider dashboard using **MVVM Architecture** and **Provider** state management.

HOMEHUTBD

[GitHub](#) | June 2025

- Developed an intelligent property listing platform using **ASP.NET Core MVC** and **SQL Server**, integrating a **Python/Flask** ML API built with **scikit-learn** to deliver real-time property price predictions.
- Engineered user authentication, ownership management, and **AI-based pricing** features to provide a seamless end-to-end experience for buyers, sellers, and renters.

AUST CODE REALM

[Demo](#) • [GitHub](#) | September 2024

- Built a full-featured online judge using **PHP**, **MySQL**, and the **Judge0 API** to host programming contests with a live IDE, automated verdict checking, and a user rating system.

Other Projects: [BHROMON](#) (Flutter, Google Maps API, OpenAI API) • [IRREVOCABLE ETERNITY](#) (C++, OpenGL)

- [CODE REALM](#) (Java, JavaFX)

Notable Achievements

- Learnathon 3.0 Hackathon by Geeky Solutions**

Champion | Dec 2024 – May 2025

Programming Contests

- ICPC Dhaka Regional Site 2025
- Intra AUST Programming Contest (AUST CSE Carnival 4.0)
- UAP Inter University Collaborative Programming Contest 1.0 (Junior)

Top 7% out of 1,717 teams | December 2025

Champion | July 2024

1st Runners-Up | January 2024

Software Exhibition & Code Refactoring

- Research Odyssey: Inter-University Research Exhibitions
- Software Exhibition (AUST CSE Carnival 5.0)
- Code Refactoring (AUST CSE Carnival 4.0)

1st Runners-Up | March 2025

Champion | February 2025

Champion | July 2024

Scholarships & Recognitions

- Khondaker Ahmed Muktadir and Mosammat Khodeza Begum Scholarship
- AUST Academic Scholarship, awarded for ranking among top 5% of students

April 2026

December 2023

Additionally competed in multiple IUPCs, earning awards and recognitions across diverse competitive events.

Extracurricular Activities

- President**, AUST Programming and Informatics Club
Led club operations, organised inter-university contests, workshops, and training sessions to foster programming culture. Dec 2025 – Jun 2026
- Vice President**, AUST CSE Society
Coordinated departmental tech events and seminars, serving as liaison between students and faculty leadership. Dec 2025 – Jun 2026
- ACM Coordinator**, AUST CP Community
Managed team preparations, conducted problem-solving sessions, and mentored students in competitive programming. Dec 2025 – Jun 2026
